Product Designer with 2 years of experience designing end-to-end web and mobile experiences for open-source and fintech products. Experienced in UX research, interaction design, prototyping, and scalable design systems, collaborating closely with product managers and engineers to deliver intuitive, user-centred solutions. Balances user needs, business goals, and technical constraints to create thoughtful, scalable products.

EXPERIENCE

Bitcoin Dev Project

May 2025 – Jun 2026

User Experience Designer

Remote

Transcript Review Platform

- Redesigned the end-to-end AI transcript review experience across four core workflows - browsing, claiming, reviewing, and history. Simplifying task progression and delivering production-ready designs accepted for future implementation.
- Identified usability issues through workflow analysis and iterative feedback, redesigning navigation, review states, and information hierarchy to reduce complexity and improve the contributor editing experience.

Website Redesign

- Led the end-to-end redesign and launch of the Bitcoin Dev Project website, conducting user research and collaborating with two engineers to improve navigation and content discovery, increasing site visits by 19% and reducing bounce rate by 8% during the first month after launch.
- Established a 0 to 1 visual identity and documented design system, creating reusable components and brand guidelines adopted across the website and community initiatives.

BTCPay, Bitshala

Dec 2024 – May 2025

Product Design Intern

Remote

- Analyzed authentication workflows to identify usability issues, redesigning the 2FA experience to reduce steps, improve visual hierarchy, and clarify authentication options through iterative feedback.
- Redesigned three core mobile dashboard sections by adapting key web features for smaller screens, improving feature discoverability and helping users access critical payment information more efficiently.

Bitcoin.design, Summer of Bitcoin

May 2024 – Aug 2024

Product Design Intern

Remote

- Designed the Bitcoin UI Gallery, a platform that organised Bitcoin wallet interfaces into searchable user journeys, helping designers quickly explore and compare wallet experiences
- Led the UX process from research and information architecture to high-fidelity prototypes, designing collections, saved references, and community submission features before presenting the MVP to fellowship mentors and earning a subsequent Product Design internship referral.

Programming Pathshala

Jun 2023 – Aug 2023

UI/UX Design Intern

Remote

- Revamped course onboarding flow and free trial dashboard using wireframing and prototyping in Figma, resulting in a 10% improvement in user engagement.
- Collaborated on landing page UI designs with cross-functional teams, contributing developer-ready wireframes that boosted course sales by 20%.

EDUCATION

York University

Toronto, CA

Bachelor of Science in Computer Science

Expected: Oct 2026

SKILLS

Design: Figma, Interaction Design, Wireframing, High-fidelity UI Design, Responsive Design, Design Systems, Component Libraries, Visual Design

Research: UX Research, Information Architecture, User Flows, User Personas, Usability Testing, User Personas, A/B Testing, Accessibility (WCAG)

Development: HTML, CSS, Javascript, Java, C++, Claude, Codex, Github

Product: Cross-functional Collaboration, Developer Handoff, Design Documentation, Design Critiques, Stakeholder Presentations, Requirements Gathering, Agile Workflows
